Hönle takes over specialist for UV water treatment UMEX GmbH

As of 1st October 2020, UV specialist Dr. Hönle AG has taken over UMEX GmbH. With this acquisition, the Hönle Group expand their activities in the market segment UV water treatment. In this highly interesting and growing market the managing board sees very good prospects for the company group who is one of the largest suppliers for industrial UV technology worldwide.

The UMEX GmbH is based in Kirchheim / Thuringia and has been one of the most successful manufacturers of UVC systems for water treatment as well as of special plants for wastewater treatment for more than 30 years. ABOX® UV plants are UV systems using premium UV lamps for a reliably inactivating harmful microorganisms in the water. This environmentally friendly way of UV disinfection with its great variety of applications is chemical-free and leaves no residues.

During recent years, UMEX GmbH could achieve constant growth. For the coming years, the managing board is expecting a strong growth of both, sales and earnings, especially based on an increased awareness of disinfection solutions.
